Mr. Rowe, a Managing Director and Director of Multi-Sector Fixed Income, joined Amundi Pioneer in 1988 and has been an investment professional since 1985.

FUND STRATEGY

The Fund seeks current income and total return.

PORTFOLIO HIGHLIGHTS as of August 27**

Portfolio Characteristics		Portfolio Allocation (%)	
Weighted Average Price	\$104.48	US Investment Grade Corporates	22.1
Weighted Average Coupon	3.76%	Non-Agency Mortgage-Backed Securities	19.9
Weighted Average Life	8.76 Years	Agency Mortgage-Backed Securities	16.5
Spread Duration	6.36 Years	Commercial Mortgage-Backed Securities	7.2
Effective Duration	5.86 Years	Asset-Backed Securities	6.9
		US High Yield	6.0
		Int' Investment Grade Corporates (USD Denominated)	5.2
		US Treasuries	3.6
		Cash	3.3
		Event-Linked Bonds	2.9
		Int' High Yield Corporates (USD Denominated)	2.6
		Emerging Markets	1.8
		Convertible Securities	1.2
		Bank Loans	0.8

The **Weighted Average Price** reflects the par weighted average price of the underlying securities in the Fund. It excludes cash, derivative exposures, equity, forwards, options, futures and convertible preferred holdings. The **Weighted Average Coupon** reflects the average coupon of the underlying securities in the Fund. **Weighted-Average Life** reflects the average time to receipt of principal payments (scheduled principal payments and projected prepayments). **Duration** is a measurement of how long, in years, it takes for the price of a bond to be repaid by its internal cash flows. **Spread duration** is the sensitivity of the price of a bond to a 100 basis point change in the bond's credit spread over a risk free rate. **Basis Point** – One basis point is equivalent to 0.01% (1/100th of a percent). **Effective Duration** (also called option-adjusted duration) is a duration calculation for bonds that have embedded options, which takes into account the fact that expected cash flows will fluctuate as interest rates change. **Weighted average life, spread duration, and duration** are estimates made using a variety of assumptions at a single point in time. These estimates can vary as market conditions change.

Due to rounding, figures may not total 100%.

Quality Distribution (%)	
AAA	27.4
AA	7.5
A	13.1
BBB	30.4
BB	10.1
B	3.7
CCC	0.3
Not Rated	4.2
Cash Equivalent	3.3

Due to rounding, figures may not total 100%. Source/Rating Description: Credit rating breakdown reflects the average of available ratings across Moody's, Standard & Poor's (S&P), Fitch, DBRS, KBRA, and Morningstar. Bond ratings are ordered highest to lowest in the portfolio. Based on S&P's measures, AAA (highest possible rating) through BBB are considered investment grade. BB or lower ratings are considered non-investment grade. Cash equivalents and some bonds may not be rated.

Yields – as of August 27		Class Y
Distribution Rate (Current Yield)		2.73%
Yield to Maturity		2.93%
Yield to Worst		2.87%
30-day SEC Yield as of 7/31/20, most recent available		2.56%

Distribution Rate – is calculated by annualizing the prior month's distribution (excluding short-term capital gains) and dividing the result by the Fund's NAV.

Yield to Maturity – The total return anticipated on a bond if the bond is held until the end of its lifetime.

Yield to Worst (YTW) – The probability weighted yield for bonds with early call options, assuming no defaults. For securitized assets, the reported yield to maturity and yield to worst are estimated based on prepayment assumptions and is subject to change based on actual prepayment of the loans in the underlying pools.

The 30-day SEC Yield is based on the hypothetical annualized earning power (investment income only) of the Fund's portfolio securities during the period indicated.

**The portfolio is actively managed and current fund information is subject to change. The holdings listed should not be considered recommendations to buy or sell any security.

For more information about this Fund, please see the [prospectus here](#), or at amundipioneer.com/us.

Call 1-800-622-9876 or visit amundipioneer.com/us for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted. The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, fund performance would be lower. Waivers may not be in effect for all funds. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

AVERAGE ANNUAL TOTAL RETURNS (%) through June 30, 2020

	1-Year	3-Year	5-Year	10-Year	Since Inception 10/31/78
Y Shares	5.44	4.34	4.00	4.47	7.12
BBG Barc US Aggregate Bond Index	8.74	5.32	4.30	3.82	7.40
Mstar Intermediate Core-Plus Bond Cat. Avg.	6.77	4.61	4.00	4.13	7.05

All results are historical and assume the reinvestment of dividends and capital gains. Other share classes are available for which performance and expenses will differ.

Class Y shares are not subject to sales charges and are available for limited groups of investors, including institutional investors. Performance without sales charge results represent the percent change in net asset value per share. Initial investments are subject to a \$5 million investment minimum, which may be waived in some circumstances.

Performance for periods prior to the inception of Class Y Shares on 9/20/01 reflects the NAV performance of the Fund's Class A Shares. The performance does not reflect differences in expenses, including the 12b-1 fees applicable to Class A Shares. Since fees for Class A Shares are generally higher than those of Class Y, the performance shown for the Class Y Shares prior to their inception would have been higher.

CALENDAR YEAR RETURNS (%) through June 30, 2020

	YTD	2019	2018	2017	2016
Y Shares	2.60	9.28	-0.53	4.39	4.48
BBG Barc US Aggregate Bond Index	6.14	8.72	0.01	3.54	2.65
Mstar Intermediate Core-Plus Bond Cat. Avg.	4.34	8.87	-0.58	4.25	3.85

The Bloomberg Barclays (BBG Barc) US Aggregate Bond Index (benchmark) is a measure of the US bond market. The Morningstar Intermediate Core-Plus Bond Category Average measures the performance of intermediate core-plus bond funds within the Morningstar universe. Indices are unmanaged and their returns assume reinvestment of dividends and, unlike fund returns, do not reflect any fees or expenses. You cannot invest directly in an index. Periods less than one year are actual, not annualized.

A WORD ABOUT RISK

The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues or adverse investor sentiment. When interest rates rise, the prices of fixed-income securities in the Fund will generally fall. Conversely, when interest rates fall, the prices of fixed-income securities in the Fund will generally rise. Investments in the fund are subject to possible loss due to the financial failure of issuers of underlying securities and their inability to meet their debt obligations.

Prepayment risk is the chance that an issuer may exercise its right to prepay its security, if falling interest rates prompt the issuer to do so. Forced to reinvest the unanticipated proceeds at lower interest rates, the Fund would experience a decline in income and lose the opportunity for additional price appreciation. Investments in high yield or lower-rated securities are subject to greater-than-average price volatility, illiquidity and possibility of default.

The securities issued by U.S. Government sponsored entities (i.e., FNMA, Freddie Mac) are neither guaranteed nor issued by the U.S. Government. The portfolio may invest in mortgage-backed securities, which during times of fluctuating interest rates may increase or decrease more than other fixed income securities. Mortgage-backed securities are also subject to pre-payments. At times, the Fund's investments may represent industries or industry sectors that are interrelated or have common risks, making it more susceptible to any economic, political, or regulatory developments or other risks affecting those industries and sectors. These risks may increase share price volatility.
