CLASSIC CONCEPT

The Importance of Diversification

The performance of most major asset classes has shifted, at times dramatically, from one year to the next. For many investors, staying diversified helps to alleviate concerns about being in the right place at the right time. It may also help ease anxiety during periods of market volatility.*

Indices are unmanaged and their returns assume reinvestment of dividends and, unlike mutual fund returns, do not reflect any fees or expenses associated with a mutual fund. It is not possible to invest in an index.

Standard deviation is a statistical measure of the historic volatility of a portfolio; a lower standard deviation indicates historically less volatility.

Data shown represents past performance. Past performance does not guarantee future results.

Chart is for illustrative purposes only and is not indicative of any investment. The data assumes reinvestment of all income and does not account for taxes or transaction costs.
